

# First Enercast Financial

1560 Broadway, Suite 110, Denver, CO. 80202

## PRODUCT SUMMARY AND RATE INFORMATION

First Enercast Financial provides forecasting, analysis, and data to energy and weather futures markets professionals. Information services range from daily informational services to raw data output used to gain a market advantage.

### Daily Website & Newsletter

This web and email based subscription service provides industry professionals with up to the minute information needed to stay current on the volatile energy markets. Service is updated continuously and delivered daily at a fraction of the cost of a standard terminal based product.

### Monthly Outlook Forecast Reports

FEF's proprietary modeling technologies consistently and accurately predict energy prices in the four to six month range. These monthly reports provide energy traders, risk managers and related industry professionals a strategic forecast advantage.

### Weather Data

Historical and forecast weather data. Forecast data is generated from the proprietary FEF ensemble weather forecast models offering an accuracy advantage over data output from the national weather service and other private weather vendors.

### Weather Risk Management

FEF assists companies in managing their weather risk by providing detailed analysis on their weather risk exposure, contract structuring, and clearing assistance.
